ALAN GARCIA M.

Desarrollador Web Full Stack

SOBRE MÍ

As a child, I played video games and made websites with free domains for my game team, i guess thats when my enthusiasm for web desing grow. Born in Argentina in 1993, I studied economics in high school and graduated with a

degree in labor relations from Kennedy University. Today, after many years, I return to that childhood passion where I made websites and started studying Backend Programming.

I currently have knowledge in HTML, CSS, SASS, GITHUB, BOOTSTRAP, JAVASCRIPT, and REACTJS. My mission is to continue my studies to become a full-stack developer.
